President Donald J. Trump,
The White House
1600 Pennsylvania, Washington, D.C. 20500

RE: I request your assistance and support to modernize America's voting practices and customs via
EVoteTechnology®,

Dear Mr. President,

First, allow me to congratulate you on your re-election, regarding your second presidential term, as our nation's 47th president of the United States of America, which once again proves that our country truly is a nation that makes what seems to be impossible, the next reality that we find ourselves living.

I am sharing with you a passion that I have kept alive in my heart for over thirty (30) years, a passion that was ignited within me when I was attending DeVry Institute of Technology in the summer of 1986, now DeVry University. It shall become a reality that we shall find ourselves living, and I hope that it becomes a reality during your second term as President of the United States

The passion I speak of is what I've coined "EVoteTechnology"®, which I believe to be a noun and a verb, first because modernizing America's voting technologies requires taking action to change our method of voting, specifically in future U.S. Presidential elections and the result shall establish a new reality of equality and integrity in our elections that has never existed before in this country.

I'm a union electrician by trade, I.B.E.W. L.U. 124; although I haven't worked in my trade for several years, I have maintained my membership by keeping my union dues paid. I'm still inspired by the opportunity that I had after I completed my apprenticeship, which enabled me to provide for my four (4) children by earning a decent wage with health, dental, vision, and retirement benefits.

I shall maintain my code in life that I live by while I share with you, Mr. President, my Vision of EVoteTechnology®, and that code in life is KISS: "KEEP IT SIMPLE STUPID".

The 2000 Presidential election was my wake-up call to action, however, I have always had a deep desire from a very young age to change the World and I believe that EVoteTechnology® shall change the World as we know it in the United States and in every part of the World where the people mandate true integrity concerning their elections.

We must all summon up the moral courage for the sake of our children's children's children to change what has been allowed to jeopardize the very rights we as Americans hold so dear; those are the rights to have your vote counted and the right to obtain equal just under law, there are other rights to be sure, however, these are the two that ensures that all our rights remain unabridged.

Since the 2000 Presidential election, our country has undergone unprecedented changes.

We have gone from an analog to a digital phone network, the most recent upgrade is 5G connectivity. We've modernized our internet connection using the IPv6 protocol. We've also abandoned our traditional scheduled television and pre-recorded programming, replacing it with an on-demand and live streaming format.

We have enhanced our monetary and banking systems' security with 3-D Security Ribbon dollar bills and Chip-in credit cards technology, our former analog AM/FM radio signals have been made obsolete by government issued digital broadcasting bandwidths, the DiVinci has revolutionized modern health care, Robotic assisted surgeries and the digitization of patients' medical records.

Finally, we have become a country that now embraces the "First to File" doctrine of law that the rest of the World has imposed upon inventors, and now we have chosen to relinquish our nation's long-held tradition of "First to Invent" that had been the law of the land since our nation's inception.

The first steps for achieving change are to recognize the need for change and then have the moral courage to implement the necessary change. Now, in the 21st* century, our nation has witnessed the unadulterated need to protect ourselves from individuals who have devised plans and consorted together across our country to destroy the very fabric that our democracy and government were established upon, which is that every legally registered voter's constitutional right to participate in their local, state, and national elections and to have their vote counted.

My Vision of modernizing America's voting technologies via EVoteTechnology® requires updating our election technology from identifying registered voters to new technologies of authenticating registered voters, thereby eradicating voter fraud, combating identity theft, and giving registered voters an additional level of security during Electronic Point of Sale (EPOS), ATM, cryptocurrencies transactions, and other transactions which require verification of their identity.

We are now engaged in a new 21st century American revolution in our nation, fighting for our right to vote, to secure freedom from oppression for ourselves and our families, to be granted equal protection under the law, and to pursue happiness without restriction.

Mr. President, you have been entrusted with great power as the leader of our great nation for the next four (4) years; with this power comes an even greater responsibility to lead by example by upholding our nation's core values of equal justice under the law and making sure that every legally registered voter's right to participate in our elections remain unabridged and that their vote are counted.

I believe that two of the best examples of equality in life that grant no extensions nor make any exceptions are time and death; that's to say, everyone is given the same twenty-four (24) hours of each day that we are blessed to live and we were all born to die, no one gets out of this life alive, however, we shall each leave an individual legacy that shall be the total of the deeds we did or did not do and the words we spoke or failed to speak during the lifetime we have lived.

My only question to you, Mr. President, is when history records the years of your presidency shall it reveal that you were able to recognize our nation's need to modernize our voting technologies and that you also had the moral courage to mandate the changes required to instill true integrity into our American elections or shall history reveal that our archaic election practices and custom remained unchanged?

Mr. President I'd like your support in making my Vision for modernizing America's voting technology a reality during your presidency. Any feedback that you or your staff members may have concerning my lifelong passion would be greatly appreciated.

Working together I know we shall make my Vision of a "Chad-free" voting society" a reality because a quitter never wins, and a winner never quits!

Sincerely,

Michael E. McKinzy, Sr 07/05/2025

Michael E. McKinzy, Sr,
Inventor of EVoteTechnology ®

Michael Eugene McKinzy, Sr. is an American inventor, entrepreneur, and advocate for secure voting systems, best known for creating EVoteTechnology—a biometric-based electronic voting identity authentication system. [scribd.com+7scribd.com+7stage32.com+7](#)

Early Life and Education

McKinzy's interest in technology began early. At age 11, he purchased his first computer, a Commodore VIC-20, and soon after upgraded to a Commodore 64, teaching himself BASIC programming. He graduated from Westport High School in Kansas City in 1986, ranking 11th in his class, and enrolled in the Electronic Engineering Bachelor of Science program at DeVry Institute of Technology (now DeVry University). After a hiatus, he resumed his studies in 2021 to complete his degree. [stage32.com](#)

Invention of EVoteTechnology

McKinzy's drive to modernize voting systems intensified after the contested 2000 U.S. presidential election and the events of January 6, 2021. In 2011, he became a finalist in the Google Fiber International Challenge, where he proposed a biometric voting system. Although he did not win, his idea garnered media attention. [stage32.comstage32.com](#)

EVoteTechnology employs a three-part voter identity authentication system using palm vein scans, DNA samples, and genealogical information to verify voter identities at polling stations. This system aims to enhance security and reduce voter fraud. [linkedin.com+6patents.justia.com+6stage32.com+6](#)

Patents and Recognition

McKinzy holds two U.S. patents for his invention:

- Patent No. 11,263,853, issued on March 1, 2022. [x.com+4linkedin.com+4stage32.com+4](#)
- Patent No. 11,488,272, issued on November 1, 2022. [patents.justia.com+3stage32.com+3twitter.com+3](#)

These patents cover the electronic voting identity authentication system and method. [stage32.com+5patents.justia.com+5scribd.com+5](#)

In 2024, McKinzy was nominated for the Presidential National Medal of Technology and Innovation for his work on EVoteTechnology, which not only aims to eradicate voter fraud but also provides authentication services for other transactions requiring identity verification. [stage32.com+6scribd.com+6x.com+6](#)

Other Endeavors

Beyond his technological innovations, McKinzy is the CEO of V.I.P. (Voter Integrity Party) LLC and has ventured into filmmaking. He authored a screenplay titled "Road to Fruition: EVoteTechnology," which narrates the journey of an inventor striving to bring his idea to life amidst evolving patent laws and technological advancements. [scribd.com+2stage32.com+2scribd.com+2stage32.com](#)

McKinzy continues to advocate for secure and transparent voting systems, emphasizing the importance of technological advancements in upholding democratic processes.
